Value Series or Super Duty Shur-Lok® for Tenders and Spreaders

For watertight protection, when it's crucial that loads stay dry! From seed to blended fertilizer to micronutrients, Shur-Lok® keeps out moisture. If you like to customize you'll find a selection of options and upgrades.

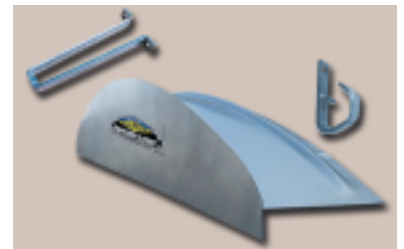

Hauling fertilizer can cause corrosion problems, but an upgrade to our stainless steel parts improves rust resistance and gives you a sharper appearance that lasts. Choose from stainless end caps, pinless crank retainers and 7-inch standoffs.

For added durability, we use corrosion-resistant paint on any exposed metal, like weld seams or areas laid bare by cutting or grinding.

Upgrading your Shur-Lok® to an electric system allows you to operate the tarp from the comfort and safety of the cab. It's now available with a remote control.

For more information, give us a call at 800.474.8756. Customer service representatives are standing by to help with any questions you may have.

SEE BOX DETAIL SHEET ON REVERSE SIDE.

Top to bottom: Shur-Lok® roll tarp on spreader; stainless steel retainer, standoff and end cap; and electric motor.
