Solar Power Pack Features

- 30-Watt Solar Panel [26³/₄" x 16³/₄" x 3¹/₄"]
- Sealed 12-Volt Gel Cell Battery
- Aluminum Battery Box [26³/₄" x 16³/₄" x 3¹/₄"]
- Mounting Hardware

G003FL-0109

Solar Power Pack

Use sunshine to power your tarp system without wiring your truck! Lightweight but powerful, our solar panel converts the sun's energy into electrical power to recharge its battery. The high-efficiency silicon cells are protected by a weather-proof plastic layer. Use it wherever an electric tarping system can be installed, on grain trailers, grain carts, dump bodies and more.

With no wiring to connect to the truck cab, installation is quick and easy. The battery is rated for over 5,000 cycles and can be safely installed vertically or horizontally. Choose from available options like our wireless remote or trailer- or truck-mounted rocker switch for additional operator convenience.

Top to bottom: Panel attachment powering the 3500 Series electric tarp from open to half-open to closed. Far left, bottom row: Battery box with sealed gel cell battery and charge controller. Above left: Extruded aluminum frame slotted for mounting hardware.
